

Feed Mill Operator

POSITION SUMMARY

This position is responsible for the safe, accurate and efficient batching, blending and pelleting of all feed.

ESSENTIAL FUNCTIONS

Evaluate feed production requirements at the beginning of each shift and plan production schedule with the assistance of the dispatcher in order to maximize pellet mill run time and reduce the number of run changes

Log each run of feed on Daily Mixing Sheet accurately; fill out all corresponding information including NAE flush verification sheets as needed

Operate pellet mill controls in a manner to produce a high quality pellet without sacrificing tonnage output

Ensure that the feed being produced is routed to the properly labeled bin in loadout to maintain feed integrity

Fill micro ingredient bins as needed, avoiding any cross contamination, in order to keep batching and the pellet mill running at all times

Ensure that the pellet mill rolls are adequately greased every 4 hours of production. Check roll adjustment periodically

Monitor printer/ ink cartridge to ensure that production and usage reports are printed clearly, legibly, and complete

Keep work area free of spilled feed material and dust. Report all leaks immediately

Other duties as assigned

POSITION QUALIFICATIONS

Must maintain an excellent attendance record, Regular and punctual presence required

Must work well without close supervision

Must follow all safety procedures and requirements; several safety training sessions are required including, but not limited to Lock Out/Tag Out, Fall Protection, Power Industrial Truck and Confined Space training

Education

Must be computer literate, and have good math skills; able to speak and write in English clearly and fluently
